Building Department Processing:

SERVICES

Our "Building Department Processing" is an important step in servicing our clients. We utilize our "Building Department Follow-Up Report" . (pictured to the right)

"Keeping our clients informed each step of the way helps our customers to better understand the many steps that are involved with each project and keeps all parties informed," says Les W. Travis, our Business Development Professional.

Contact Les W. Travis at: (702) 876-0668

How does your firm track a project through the plan check process?

Ask The Architect

The plan check process form tracks the following:

 - f. Property Management Division
 - g. Quality Control Division
3. Utility Service
 - a. Spring Telephone Engineering
 - b. Nevada Power Engineering
 - c. Southwest Gas
4. Fire Department
5. Health Department
6. Current Special Comments

SPOTLIGHT

Client: Meet Tete Klein, Clark County Director of Engineering

Tete Klein, CCSD Director of Engineering, has been part of the Clark County School District since 1989. She wouldn't ever hesitate to recommend GGWArchitects², based on the work they've already done. The Clark High School modernization project was Tete's first interaction with GGWArchitects².

Tete's enthusiasm for her profession is strong. She truly "loves engineering". Born and raised in Chihuahua, Mexico, Tete graduated from the University of Chihuahua with a Civil Engineering degree. She obtained her engineering license 1 year later and attended UNLV to start her Master's Degree.

Tete worked on commercial and public projects as Regional Manager, Project Manager, and Project Engineer before coming to Las Vegas in 1987. Once here, Tete attended CCSN for Construction Management and Building Technology classes. She joined CCSD as Building Inspector making sure that all projects were built per plans, specs, and codes. She spent 6 more years in CCSD's Planning Dept as Engineering Specialist. She then advanced to Construction Management as Project Manager and Director of Engineering.

SPOTLIGHT

Project: Gymnasium @ Clark High School

Tete Klein, CCSD Director of Engineering, displays this Clark High School Auxiliary Gym rendering in her office for all incoming visitors to see.

Begun in 1998, the auxiliary gym addition "was in connection with the expanded classroom project to accommodate increasing growth of the student body at Clark High School," says Architect Gary Guy Wilson. The full-size gym houses bleachers, classrooms and areas for practices and competitions for intramural/intermural, Jr. Varsity, and Varsity students. "The project included modernizing a connected weights/workout room with all the necessary lock and shower facilities."

"Our primary objective was to design in such a way as to blend in with the original, existing building.
