## School "Growth" and You...

The Clark County School District has been faced with enormous growth in Southern Nevada, specifically the greater Las Vegas valley. The CCSD charges its approved consultants with the enormous task of managing the growth problems at their schools.

One of the most cost effective ways to alleviate the continued growth problems at **Roy Martin Middle School** was to expand existing school facilities; being proactive and planning for the future.

But expanding the 43-year old school presented many difficulties including connecting to existing utilities, drainage and grading. Also making present-day codes work for an old school turned out to be more of a challenge than anyone anticipated.

These items were addressed and the problems solved through diligent research of existing conditions and constant communication with CCSD Planning staff, Construction Management Staff, and the Facility users. "Our professional relationship with CivilWorksInc is solid.

***"They have kept our projects on target, and we recommend them to others,"*** says E. Dale Scheideman, CCSD Director of the New School & Facility Planning Department.

**So how did **CivilWorksInc<sup>2</sup>** do it?** By simply **"Doing What We Do Best"** as described below...

## "Sensible" Solutions...

**Timeliness, Accuracy, and Budget** are the critical watchwords in the provision of civil engineering services for the **Educational Facilities**. **CivilWorksInc<sup>2</sup>** focuses on these areas when providing civil engineering services for the preparation and delivery of drawings for the processing and construction of new building and renovation projects alike.

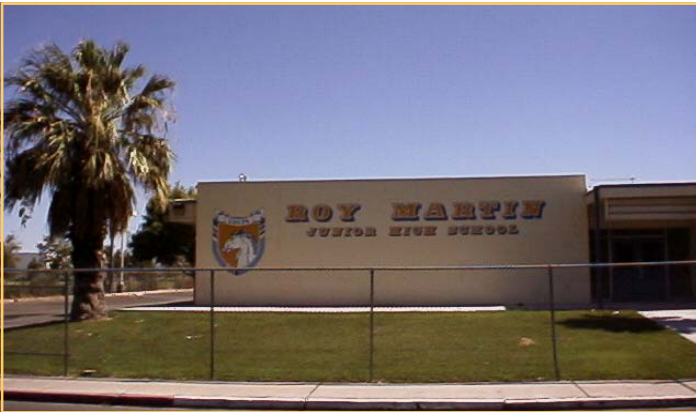

**"Timeliness"** means within (30) work-days of authorization a "Complete" set of Engineering Plans including: Topographic & Boundary Surveys, Horizontal Control, Grading, Utility, Sections, and related

Details are ready for necessary Public Works review and approvals. In addition, Timeliness, in our opinion, is the ability to coordinate with Public

# CivilWorksInc<sup>2</sup>

Engineering with "sensible" solutions tailored to your "specific" needs.

7625 South Dean Martin Dr., Suite #101 - Las Vegas, NV - 89139
